PROFESSIONAL SUMMARY

Detail-oriented Associate Software Engineer specializing in full-stack web development with expertise in Java, Spring Boot, React, and TypeScript. Proven track record of designing and deploying robust enterprise-scale applications and implementing clean code methodologies. Highly adaptable professional who thrives in collaborative environments and enjoys the teamwork required to achieve shared goals.

PROFESSIONAL EXPERIENCE

BoonFair Technologies
Associate Software Engineer | Sep 2024 - Present

- **Financial Automation (Journi Pay):** Engineered the "FC Payment Runs" module, a comprehensive system that automates foster carer allowances. Developed the logic to calculate payments based on child-specific rates and active placements, ensuring accurate and timely remittances.
- **Electronic Signature Engine:** Developed a formal approval and sign-off workflow integrated with an E-Signature engine. This replaced traditional "Approve/Reject" toggles with a secure, tracked signature process for leave and record approvals.
- **Role-Based Analytics Dashboard:** Built a modular analytics engine providing real-time visibility into compliance and clinical status, tailored to specific user roles within the foster care service.
- **Regulatory Reporting:** Developed a centralized reporting engine capable of generating complex Regulatory Registers (compliant with Ofsted/CIW) and operational management reports.
- **Staff & Compliance Management:** Implemented a User-Staff dual entity model to manage HR data and compliance, ensuring every staff member has both a system user profile and detailed employment records.
- **System Optimization**: Refactored core modules including User Registration, Lookup Lists, Action Groups, and School management to improve performance and maintainability.

CORE COMPETENCIES

- **Languages:** Java, TypeScript, JavaScript, Kotlin, PHP
- **Frameworks & Libraries:** Spring Boot, React, Next.js, NodeJS, ExpressJS, Bootstrap, Ant Desing
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Tools & Cloud:** Azure, Git, Docker, WordPress, GitHub, Postman, AWS, CI/CD Pipelines
- **Professional Skills:** Clean Code Architecture, i18n Implementation, Testing & Debugging, Problem-solving, Teamwork, Time Management, Adaptability, UI/UX Implementation, Clean Code principles, Component-based Architecture, and Debugging complex enterprise systems.

KEY PROJECTS

Sign Language Learning Application

- Practice drawing symbols and objects to improve memory retention and recognition.
- Project management and Team Leadership
- Built utilizing Machine learning, Spring boot, React, Type Script, Ant Desing, Fast API

Hotel Gayana Hotel Management System

- Executed full system design and development.
- Built utilizing MongoDB, ExpressJS, NodeJS, ReactJS, and Bootstrap.

E-Channeling System

- Engineered full system design and development.
- Developed leveraging Java Servlet, MySQL, HTML, CSS3, JavaScript, and Bootstrap.

Helpmate Donation App

- Led full system design and development.
- Created utilizing Android Studio, Kotlin, and Firebase.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) - Malabe

BSc (Hons) in Information Technology Specializing in IT

Relevant Module – Object Oriented Programing, Mobile Application Development, Data Structures & Algorithms, Operating System and System Administration, Computer Network, Database Management System, Data Science and Analytics, Cloud Computing, Information Assurance & Security, Innovation Management and Entrepreneurship, Research Project

CERTIFICATES

- **Modern React with Redux** Feb 2026
  Udemy

- **AWS Academy Graduate - AWS Academy Cloud Foundations** Oct 2024
  Amazon Web Services (AWS)

- **Introduction to Generative AI** Jun 2023
  Google Cloud Skills Boost

- **AWS: Deployment, Provisioning, and Automation** Jul 2023
